

Tips from Terri, December, 2007

We encourage all our residents to use compact fluorescent bulb for energy savings, please note compact fluorescent bulbs do not work properly with a dimmer switch and should not be used in this application. Remember compact fluorescent bulbs contain mercury and need to be disposed according to local and federal laws. Visit [www.lamprecycle.org](http://www.lamprecycle.org) or call 1-800-397-1704 Also you can also leave your bulbs with Security in the front lobby, and we will properly dispose of the bulbs for your convenience.

Thank you- Terri Quile
